

Cell Phone Policy Adoption and Implementation Status Survey

December 2024

Executive Summary

[Ohio law](#) requires all schools to adopt a policy governing the use of cell phones by students during school hours by July 1, 2025. The Ohio Department of Education and Workforce, under the leadership of Ohio Governor Mike DeWine and Lt. Governor Jon Husted, encourages all districts and schools to adopt a local policy to *eliminate* cell phone use during the school day.

The Department recently collected information on how local schools and districts will implement or are currently implementing [Ohio law pertaining to cell phone policies in schools](#). The Department worked with the Management Council of the Ohio Education Computer Network to deploy a brief survey to all superintendents and community school leaders on the status of local policies required to be adopted by July 1, 2025. After initial reporting closed and preliminary results were shared, the Department re-opened the survey and directly followed up with those who did not respond to ensure the status of nearly all districts were included. This report provides key findings and aggregated data from respondents.

Key findings

- Overall, 98% of all possible respondents replied to the survey, representing 599 traditional districts, 336 community schools, eight independent STEM schools, and 49 joint vocational school districts.
- Among the 992 respondents, about six in 10 (61%) have adopted formal policies. Town and Suburban districts (as categorized by the state's [district typology](#)), along with joint vocational school districts, are somewhat more likely than other districts to be in the drafting or approval phases.
- Two-thirds (65%) of respondents reported they implemented their policies at the beginning of the current school year. The rate of early implementation was highest among Urban districts.
- A comparable share of respondents reported cell phone use will be limited to select times of the school day (45%) or disallowed at any time during standard school hours (41%). Suburban districts and joint vocational school districts are much more likely to employ a limited-window versus full-day approach. Community schools are the most likely to disallow usage throughout the school day. Some districts noted this aspect of the policy will vary by grade band.
- About one in six respondents indicated they could use further assistance in communicating expectations to students and parents, and another one in six indicated

the same for discipline or alternatives to discipline. Some districts inquired about guidance or financial support for cell phone collection and storing systems.

Responses

This brief represents the results of a survey sent to 1,008 local education agencies (LEAs), including all traditional public school districts, community schools, independent STEM schools, and joint vocational school districts. The survey was conducted during two windows from late August through early October and included several reminders and targeted outreach from the Department and the Management Council. In all, there were 992 respondents for a 98% response rate. *Appendix B* includes the 16 districts and community schools that did not provide survey responses. *Appendix C* indicates the policy adoption status and extent of cell phone restriction for each of the reporting LEAs.

In the tables below, please note that percentages may not total 100% due to rounding.

Policy Adoption

Among all respondents, about six in 10 (61%) already have adopted formal policies, as displayed in *Table 1*. Town and Suburban districts, along with joint vocational school districts, are somewhat more likely than other districts to be in the drafting or approval phases (*Appendix A*).

Through multiple channels, including this survey, the Department is aware that some districts have had policies approaching or meeting the state requirement in place for several years.

Table 1. Survey Question—What is the current status of adopting a policy that meets Ohio law pertaining to cell phone use in schools?

Response	Count	Share
Policy formally adopted	606	61%
Policy drafted and ready for adoption	49	5%
Currently drafting new policy, revising existing policy, or collecting input	304	31%
Not yet started	33	3%

Timing of Policy Implementation

Two-thirds of all respondents reported they implemented their policies at the beginning of the current school year as shown in *Table 2*. By district type, Ohio's Urban districts have the highest percentage of early implementers (*Appendix A*).

The remaining one-third of respondents were split between either implementing the policy later this school year or at the beginning of next school year. Suburban districts (25%) are the most likely to be waiting until next year for implementation.

Table 2. Survey Question—What is the timing of implementing a policy that meets Ohio law pertaining to cell phone use in schools?

Response	Count	Share
Policy implemented at the beginning of this school year (2024-2025) or earlier	649	65%
Policy to be implemented later in this school year (2024-2025)	173	17%
Policy to be implemented at the beginning of next school year (2025-2026)	170	17%

Cell Phone Policy Restriction for Students

As shown in *Table 3*, survey reporting reflects a relative balance across the state in policies that will limit cell phone use to selected times of the school day, such as during lunch or between classes (45%), and policies that will disallow cell phones at any time during standard school hours (41%). Suburban districts and joint vocational school districts are much more likely to employ a limited-window versus full-day approach, and community schools are by far the most likely to disallow usage throughout the school day (*Appendix B*).

As noted from multiple channels, the Department is aware that several districts vary the restriction by grade band, generally with less usage permitted for younger students.

Table 3. Survey Question—What is, or will be, the extent of cell phone restriction for students (excluding those with health or learning needs and other exceptional situations)?

Response	Count	Share
Cell phone use is disallowed at any time during standard school hours.	410	41%
Cell phone use is limited to selected times of the school day.	442	45%
Not yet determined	140	14%

Need for Additional Clarifications or Supports

About one in six respondents indicated they could use further assistance in communicating expectations to students and parents, and another one in six indicated the same for discipline or alternatives to discipline. About one in 10 respondents asked for more information on exceptions to the policy.

Among write-in items, some districts inquired about guidance or financial support for cell phone collection and locking systems. Other items pertained to model guidance for the use of cell phones on school buses and concerns about how to mitigate unintended impacts on school attendance.

Summary

Overall, a majority of schools and districts already have adopted or currently are implementing policies that meet [Ohio law pertaining to cell phone use in schools](#), while many others are beginning to draft or approving their policies.

The Department's [Cell Phones in Ohio Schools webpage](#) provides information schools and districts can use as they develop and implement policies that meet [Ohio law pertaining to cell phone use in schools](#). Marquita Curry in the Department's Office of Whole Child Supports is available to answer questions and provide additional information by email to wholechild@education.ohio.gov.

**Appendix A: Response Sets by District Type
(limited to types with at least 10 districts)**

What is the current status of adopting a policy that meets Ohio law pertaining to cell phone use in schools?

Response	Count	Share
Rural		
Policy formally adopted	144	63%
Policy drafted and ready for adoption	11	5%
Currently drafting new policy, revising existing policy, or collecting input	67	30%
Not yet started	5	2%
Town		
Policy formally adopted	107	55%
Policy drafted and ready for adoption	7	4%
Currently drafting new policy, revising existing policy, or collecting input	71	37%
Not yet started	9	5%
